The company intends to constantly reduce its impact on the environment by achieving the following goals:

- reducing emissions;
- reducing energy consumption;
- limiting the amount of generated waste, especially in the area of hazardous waste;
- reducing the consumption of raw materials, which deplete natural resources;

and also intends to improve the functioning of its processes in terms of ecology, both in terms of design, implementation and assembly of equipment for welding lines for welding car body elements, as well as for other industries. In order to achieve the tasks assigned,

AUTOROBOT-STREFA Sp. z o.o. defines the course of actions which aim at:

- ensuring compliance, maintaining and applying current legal requirements regarding its impact on the environment
- following ecological criteria at every design phase, as well as taking into account environmentally friendly solutions,
- raising the environmental awareness of employees and their constant involvement in the Environmental Management,
- preventing pollution, reducing the negative impact of the conducted activities on the natural environment,
- constant use of a rational approach to the consumption of energy, fuels, oils and other resources that deplete natural resources,
- improvement of technological processes and equipment used for production, modernization of facilities in order to reduce the harmful impact on the environment,
- improvement of processes in order to reduce the amount of post-production waste, cooperation with authorized external entities for their collection and recycling.

The commitment and co-responsibility of all employees as well as the functioning and constantly improved Environmental Management System, compliant with the requirements of the PN - EN ISO 14001:2015 standard, is a guarantee of success by the company in all areas of its activities.

The management board of the company and the entire staff intend to co-create environmental awareness among all interested parties, as well as with regard to the implemented design and production processes, acting in an orderly manner, according to uniform principles based on the requirements of ISO 14001: 2015
